BILL NYE AS A JUSTICE.

An Account of a Home-made Marriage Ceremony in a Wild Country.

I forgot to say that the officer of justice of the peace was not a salaried one, but dependent upon fees, the county furnishing only the copy of the revised statutes and a wooden, slightly rusty and rusty-looking chair. So while I was called Judge Nye, and frequently mentioned in the papers with great consideration, I was not of much account half the time, and once could not mail my letters for three weeks because I did not have the necessary postage. Friends in the eastern states may possibly recall the time when my correspondence, from some unknown cause, seemed to flag. That was the time. Of course I could have borrowed the money, but I had, and still have, a foolish horror of borrowing money. I did not mind running an account, but I hated to borrow.

The first business that I had was a marriage ceremony. I went to the groom on the street. He asked me if I could marry people. I said that I could to a limited extent. He said that he wanted to get married. I asked him to secure the witnesses, and I would get the other ingredients. He then wished to know where my office was. He said that he had a moment that there was no fire in the stove; also, no coal; also, that the west half of the stove had fallen in during the night. So I said that I would marry them at their home. He maintained that his home was eighty miles away, and that it would consume too much time to go there.

Where are you stopping, sir? I inquired—using the fine county style of syntax in order to show that I was one of the people.

'Well, we met here, squire. She came in on the Last Chance stage, and I camped up in the "out" canyon, not far from Soldier creek. We went on there, I reckon.'

I did not mind the ride, so I locked my office, secured a look of forms and married the young people at the livery stable went out with them and married them in a rambling, old-fashioned way. The bride was a pert from Owl creek, wearing a piece of the pious age. The rich Castilian blood of the bridegroom dwelled in her cheek along with the navy blue blood of Connecticut on her father's side. Her hair was the wing of a raven, and she wore a tangle of clam shells about her neck. Her husband was a country storekeeper of front teeth, selected from the early settlers at the foot of Independence mountains. With the shrewdness of a Yankee and the tactfulness of the sage she combined the grotesque grammar of Pike county and the charming naïveté of the poor puncher. She was called Beautiful Snow. But I think it was mostly in a spirit of banter. She was also no longer young. I asked her, with an air of badinage, if she remembered Pizarro, but she replied that she was away from home when he came through. The bridegroom was a serious person. Their plumbing was very poor indeed; so also were their jokes. Her features were rather classic, however, and I was about to give clean cut, but on more mature thought I will not say that. Her nose was bright and piercing. It resembled the breastbone of a sandhill crane.

The groom was a young man, a good-looking fellow, but rather low for a very low figure. That is why he married Beautiful Snow without any blinking; also why I have refrained from mentioning his name; also why I kissed the bride. I did not want to kiss her. There were others who had claims on me, but I did not wish to give needless pain to the groom, and so I did it. He had no money, but said that he had a saddle which, if I could use it, I was welcome to. I did not have anything to put the saddle on at home, but rather than return empty handed I took it.—Bill Nye in Century.

WITHOUT KNIFE FIRE.

Mr. E. Carmichael, a prominent citizen of Honiata, Texas, writes:

'I wish to tell you what Swift's Specific has done for my wife. Several years ago there appeared a growth on the corner of her nose which gradually increased in size, and became quite painful on washing her face. It would frequently bleed. The doctor called it cancer, and advised that it be removed by the knife or burning, stating that it never would do to neglect it. My wife refused to do it, but at last the same time it continued to grow worse. After a time she commenced taking S. S. S., which effected an entire cure. She used a half bottle about last October. We both think there is no medicine in the world that will equal Swift's Specific, and we would like for all sufferers to know the benefit she has received from it.'

S. S. S. cures skin diseases of this character by forcing out the poisonous elements and the poison also, and is valuable on all blood and skin diseases will be mailed to all applicants free. Address, SWIFT SPECIFIC CO., Atlanta, Ga.

Payoff Comes After Eighteen Years.

Charles King, of Little Falls, has done a very commendable thing, by paying \$4,600 to the operators that worked in the Saxony mill at the time of the fall of the Saxony mill, which occurred in 1873, during a depression of the coal trade.

King was not obliged to put this money out, but he always said that the first time he controlled the amount of capital that would pay off the wages of the men who worked in the Saxony mill, he would make it his duty to do so.

One hundred and three persons, who were working in the Saxony mill, have been made happy by receiving checks for their back wages. A few of the old employees have died. The heirs of deceased operatives will be paid the amount due them.—Little Falls (N. Y.) Herald.

Marriage Terribly Irrevocable.

A little while ago I "interviewed" the father of one daughter, and she passing this on this very and various point. He is a man who understands himself and knows how to say what he means, so when his open brow darkened at a point that his girl might not always be his alone, I pushed inquiry. It did not satisfy me to tell that he had a loaded revolver and he told me ready for my fellow who should dare ask for his daughter. The best thing a man could do, and the worst thing a woman ever did, was to marry. Sensible citizens, even when fathers and sons, do not rave senselessly. Presently he steeled down into calm coherence.

"It is because we know men—how loose in grain many of them are; how selfishly inconsiderate are the best of them; how dull of sensibility and slow of apprehension are all of us when compared with women—that we shudder to resign our tenderly nurtured girls to them," he said, feelingly. "Men understand what I mean! And marriage is so terribly irrevocable."

"Yes, as you have been glad of it, on my own account, ever since. Had I known a woman's needs and nature then as I do now, her delicate sensibilities, her capacity for love and for suffering, I could never have had the presumption to offer her marriage with myself."

The more refined the man's nature, the more strongly does he feel what this true husband and nobleman of God's own making expressed. Yet, despite his testimony, the truth abides that the best earthly happiness for woman is found in a judicious marriage.

When her choice is wisely made, there are no peculiar miseries in wedlock; no thorns when she would not stay were she to remain celibate. It is only through her failure to enter—as the church service puts it—"discreetly" upon this ordinance of divine appointment that inevitable sorrow is incident upon it.—Marion Harland.

An Elegant Luncheon.

Last Saturday a charming luncheon was given by Mrs. J. H. Kenney in honor of Miss Frank, of Breckenridge county, Kentucky, who has been visiting her for several weeks. She was assisted by Mrs. M. Johnson, her sister, and Miss Frank. Covers were laid for 12, and the luncheon served in courses on rare old china and crystal. The table decoration was a mass of white and pink chrysanthemums arranged around mirrors extending the length of the table. The silver candelabra were entwined with smilax, and at each place a centerpiece of white and pink flowers.

The wide open doorway led into the dining room, which was banked on either side with rare plants, and the pictures and small tables decorated with vines and roses. The softest of lights were shed over the room from numbers of shaded wax candles and fairy lamps.

However beautiful though the surroundings, the array of bright young faces and the sparkling conversation of the young ladies were more than its equal, and their brilliant conversation kept pace with the flowing food. The event will be long remembered by the participants.—Fulton News.

Pain Relieving for Men.

The shade of newness of September was milder, and beautiful indeed were the combinations in which he treatment was varied. Effort is now being made to introduce in the United States a very remarkable nut, Japan called the "ginkgo." THE REMOVAL OF THE STONE.

Judge Finletter, in charging the jury in a case tried in common pleas court, gave an opinion emphatically sustaining the rights of husbands to rule their homes.

The suit was that of John Yates against Christina F. M. Greaves, brought to recover damages for false arrest and malicious prosecution. Miss Greaves lived in Yates' home. She was ordered by him to leave, but Mrs. Yates, to whom Miss Greaves paid her board, told her to stay. Yates subsequently upon coming home, quarreled with his wife and, it is alleged, choked her, and when Miss Greaves interfered, it is alleged, he threatened her. The next morning Mrs. Yates went with Miss Greaves to a magistrate's office, where the latter swore to a warrant charging Yates with threatening her. He was locked up, and spent the night in a station house.

Miss Greaves did not appear against Yates the next day and he was discharged, but in her behalf it was alleged that her nonappearance was due to solicitation by Yates' brother-in-law, who said that he could get her back. After his release Yates brought the present suit against Miss Greaves.

Judge Finletter said that Miss Greaves should have cleared the direction of Yates to leave. She had no right to remain in the home against his wish. The jury would therefore have to find a verdict for the plaintiff. In arriving at the damage they should consider the condition in life of the parties, the injury to the plaintiff for she should not "fix her verdict for him for a few dollars or a few cents, making it the same as if she were a man, but they should give him a sum as would show that in Philadelphia every husband has the right and must rule his own household."

The jury after a short deliberation returned a verdict of \$500 for the plaintiff. —Philadelphia Press.

Some of the distinguished stars.

In a down town case the other day I met two gentlemen whose names will read remarkable men and remarkable events in American history. They were Lieutenant Fremont and Lieutenant Lawrence of the United States navy. The former is the son of the late distinguished John C. Fremont, "the Pathfinder," who ran for president of the United States, and the other was Lawrence, the grandson of the hero of Lake Erie, old "don't give up the ship."

That these two gentlemen should come into the New York lunch room for something to eat and drink was nothing remarkable, but that they should come in arm and arm, and two naval chums, was something sufficient to stir the imagination. Lieutenant Fremont is a student of the new cruiser Philadelphia. He is a fine specimen of manhood, as was his father before him.—New York Herald.

How to select a Turkey.

In this country only a turkey found in a wild state. It is very fitting, therefore, that in the Christmas dinner it should be the principal dish. Turkey must be wisely chosen, well cooked and properly served. It should be short and plump, the meat white, with some fat, the legs black and smooth, and if there be spurs they should be short. The end of the breastbone should be shining, more like granite than bone. A turkey that is long in proportion to its size, and has dark or bluish flesh, is a poor specimen. It should be freshly flavored and juicy. A dry plucked turkey will be found to have a much better flavor than a scalded one. All poultry that is dry plucked costs a few cents a pound more than the scalded, but it is well worth the extra price.—Marion Harland.

Next Nothing But.

A man in San Francisco has some queer divining tools. They are four slender pieces of steel, tapering to a point at one end and flattened out at the other, with notches in the extremities like the notches in an arrow. Two are each shorter than the other. Two persons use them, each taking hold of one long and one short rod with the thumb and forefinger and holding them out horizontally with the hands close together. The notches are pressed to gether, a few inches the rods move from side to side, and up and down, pointing, it is said, to the part of the room that contains the buried treasure.

Some persons cannot use the rods, but those who can may easily find the hiding place of any valuable.—New York Sun.

Henry Winter. Wm J. Winter. John M. Bontrager.

THE REASON WHY.

Did you ever stop to think how it is possible for some clothing dealers, who advertise daily reductions in prices and who are apparently selling goods for nothing, to wear fine clothes, live off the fat of the land and drive fast horses? We will tell you. It is because they pull the wool over your eyes. They make you believe they are cutting prices, when the fact is you don't get a cent off—unless it is some old shop-worn, moth-eaten garment, which it pays to get rid of at any price.

We are selling honest Clothing at honest prices, and which is actually cheaper than you can buy trashy clothing for at any of these so-called cut-rate houses.
